Hazardous Weather

Hazardous Weather

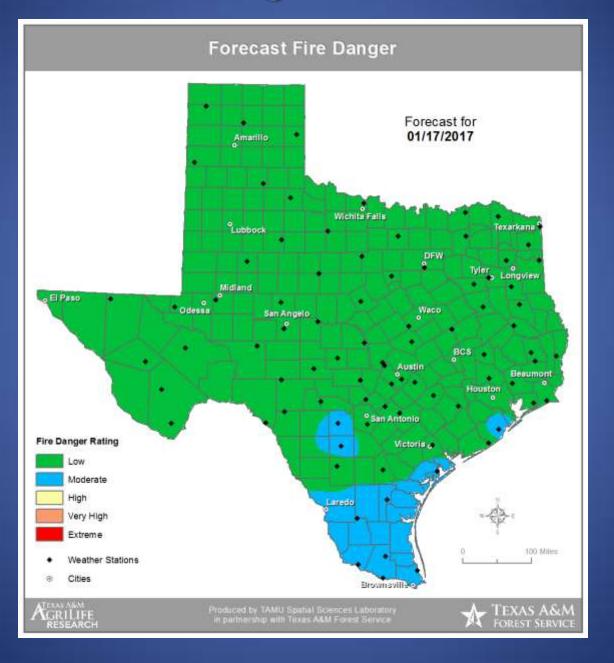

An upper level disturbance and an overrunning moisture pattern will bring numerous showers and a few thunderstorms across South-Central Texas for much of the day. A few strong storms could develop closer to the Texas Coastal Bend with hail being the primary threat. Localized heavier downpours over 1 inch are possible. The green shaded area indicates where most models think the heavier totals will occur. When it's not raining, look for cool and cloudy conditions with highs ranging from the low 50s North to the middle 60s Southeast.

Weather Warning/Advisories Issued

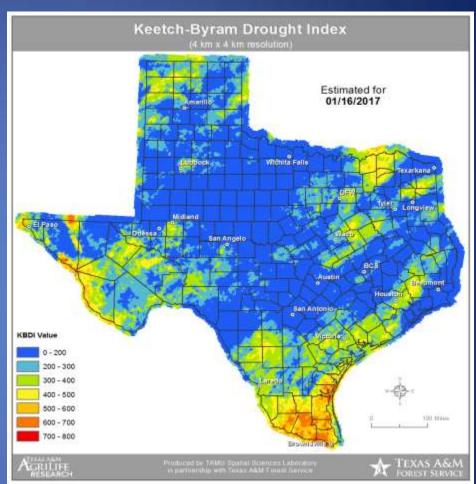

DATE	WARNING TYPE	LOCATION
